TITLE Direct Submission JOURNAL Submitted (15-SEP-2011) Seattle Biomedical Research Institution, 4	COWMENT ON DECES, 2001 this sequence version replaced gi:15624885. * NOTE: This is a "working draft" sequence. It currently * consists of 4 contigs. Gaps between the contigs * are represented as runs of N. The order of the pieces * is believed to be correct as given, however the sizes * of the gaps between them are based on estimates that have * provided by the submittor. * This sequence will be replaced * by the finished sequence as soon as it is available and * the accession number will be preserved.	* 1 7210: contig of 7210 bp in length

 Patent No. 554987
GENERAL INFORMATION:
APPLICANT: BARENKAMP, STEPHEN J
APPLICANT: ST. GEME III, JOSEPH W
TITLE OF INVENTION: HIGH MOLECULAR WEIGHT SURFACE PROTEINS
TITLE OF INVENTION: OF NON-TYPEABLE HAEMOPHILUS
NUMBER OF SEQUENCES: 8
CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               983 -NI-ISKNGINTVLL-KGVKIDVKYIQPGIASVDEVIEAKR 1020
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           CLASSIFICATION: 424

Sequence 2, Application US/08719641

Patent No. 6218141

GENERAL INFORMATION:

APPLICANT: Barenkamp, Stephen J

TITLE OF INVENTION: High Molecular Weight Surface Proteins

TITLE OF INVENTION: of No. 6218141-Typeable Haemophilus

NUMBER OF SEQUENCES: 10

CORRESPONDENCE ADDRESS:

ADDRESSEE: Shoemaker and Mattare, Ltd.

STREET: 2001 Jefferson Davis Hwy., 1203 Crystal Plaza

                                                                                                                                                                                                                                                                                                                                       Sequence 330, Application US/09538092

Patent No. 6753314

GENERAL INFORMATION:
APPLICANT: Giot, Loic
APPLICANT: Mansfield, Traci A.
TITLE OF INVENTION: Protein-Protein Complexes and Method of Using Same
FILE REFERENCE: 15966-542

CURRENT APPLICATION NUMBER: US/09/538,092

CURRENT FILING DATE: 2000-03-29

PRIOR PLING DATE: 1999-04-01

PRIOR APPLICATION NUMBER: 60/127,352

PRIOR FILING DATE: 1990-04-01

PRIOR APPLICATION NUMBER: 60/127,352
